Profile

Computer Science graduate with a First-Class degree and a strong foundation in software development principles, with experience in full-stack application development. Proficient in developing software across frontend and backend technologies, with a passion for building reliable, user-focused solutions. Seeking a software development role that provides opportunities to learn new technologies, tackle challenging problems, and continue developing both technical and professional skills.

Education

Degree: BSc Computer Science | Birmingham Newman University | First-Class Honours

A Levels: Physics, Chemistry and Engineering | Halesowen College

Relevant Modules:

- IoT – 92%
- Machine Learning – 91%
- Mobile Application Development – 88%
- Creative Computing – 84%
